SEO AGENCY

SEO PROPOSAL FOR SFL WORLDWIDE

Rebuilding organic search for *sflworldwide.com*

A 12-month SEO engagement covering technical fixes, content, keyword targeting and reporting, delivered and implemented by Crown's team.

PREPARED FOR

SFL Worldwide

PREPARED BY

Crown SEO Agency

DATE

30 Sep 2026

VALID UNTIL

30 Oct 2026

What our audit found

We crawled all 455 pages of sflworldwide.com, benchmarked it against 11 competitors, and mapped 3,355 search keywords to its pages. The site passes the basics, but several issues hold it back.

10/40 core searches where SFL appears, 8 of them about India	144 retired URLs returning errors, with no redirect	61 pages that can't be reached through site links	0/246 blog posts with article markup for search engines
--	---	---	---

The issues that matter most

- **Service pages hidden from Google.** The FedEx, DHL, UPS, USPS and Domestic Shipping pages tell Google the homepage is the page to index instead of them.
- **Lost pages still ranking.** 144 retired URLs return errors, and one still ranks #3. Live pages link to 34 of them.
- **Blog posts hard to find.** The blog index shows 9 posts. The rest load behind a "Load More" button, and 146 posts are 4 or more clicks from the homepage.
- **Templated country pages.** Country pages share a median 32% of their text with 10 or more sibling pages. The Pakistan and Nigeria pages show rates from November 2023.
- **Heavy pages.** The median page is 784 KB of HTML, the heaviest of the 12 sites measured, and pages are never cached. On mobile, the main content takes 5.2–8.7 seconds to load on most pages tested.
- **Missing pages.** There's no international car shipping page (686 keywords), no moving pages for Dubai, the UK or Canada, and no pages for Sri Lanka or Bangladesh.

The full audit, with page-level evidence files, comes with this proposal. Every figure here was measured on the live site in September 2026.

What this engagement delivers

OBJECTIVE	MEASURE	TARGET DATE
Make every service page indexable	Five service pages declare their own URL as canonical	Week 2
Recover the value of lost pages	Every retired URL with traffic or backlinks redirected; 0 broken internal links	Month 1
Make every post reachable	Every blog post within 3 clicks of the homepage	Month 2
Structured data on every template	Article, author, breadcrumb, organization and office markup live	Month 2
Faster pages	HTML cached at the edge; LCP images optimised; lighter tag load	Month 4
Pages for the biggest keyword gaps	International car hub, 3 moving pages, Sri Lanka and Bangladesh live	Month 9
Visibility beyond India	Movement on the 23 main keywords, tracked and reported monthly	Ongoing

The REIGN framework, applied to SFL

Every Crown engagement runs through REIGN, our five-phase method. For SFL, the reconnaissance phase is already complete.

R RECON Complete Full crawl, competitor benchmark, keyword universe and search-result analysis.	E ENGINEER Weeks 1–2 A 90-day roadmap: technical fixes first, then content clusters, then growth.	I IMPLEMENT Months 1–12 Code changes, redirects, markup and content, built and shipped by our team.	G GOVERN Ongoing Rank tracking, monthly reporting, and a re-crawl after every release.	N DOMINATE Month 6+ Expansion into new routes, moving markets and AI search visibility.
---	---	---	--	---

What we will provide

Technical SEO, implemented

Our team writes and tests the code changes and submits them to SFL's repository for approval. They cover:

- canonical and hreflang fixes;
 - redirects for the 144 retired URLs and repairs to the broken internal links;
 - the XML sitemap, robots.txt and 404 page;
 - crawlable blog pagination and topic hubs;
 - caching headers and image optimisation.
-

Content: new pages

14 new pages over 12 months:

- an international car shipping hub and route pages for Nigeria and the UAE;
 - moving pages for Dubai, the UK and Canada;
 - Sri Lanka and Bangladesh shipping pages;
 - a freight-forwarding service page;
 - 5 office location pages.
-

Keyword targeting

A keyword-to-page map covering the 3,355-keyword universe, with one main keyword per page so pages stop competing with each other, and a question bank for FAQs.

Speed and tag cleanup

A written plan for Google Tag Manager and Cloudflare changes, with step-by-step instructions for SFL's account owners, plus a fix for the homepage hydration error in code.

Structured data

Article, author, breadcrumb, organization, website and office-location markup, built into the page templates so every new page inherits it.

Content: rewrites

- **Priority pages:** 10 rewrites (UK, Canada, Pakistan, Nigeria, Philippines, Ghana, UAE, India moving, international relocation, India to USA).
 - **Posts that don't answer their title:** fixes to 10 posts.
 - **Templated country pages:** about 15 rewritten.
 - **Rate tables:** refreshed every quarter.
-

Tracking and reporting

Weekly rank tracking on the 23 main keywords. A monthly report on work shipped, rankings, organic traffic and next month's plan. A re-crawl of the site after every release to confirm each fix works.

One named strategist

A single senior contact for the whole engagement, with a monthly review call and email support.

Twelve months, in order of impact

MONTH	TECHNICAL	CONTENT
1	Canonical and hreflang fixes; redirect map and redirects; broken-link repair; sitemap, robots.txt and 404 page; rank tracking set up	Fixes to the India transit post and the 9 cost posts
2	Blog pagination and topic hubs; structured-data components	Nigeria and Philippines rewrites
3	Image optimisation; caching headers; hydration fix	International car shipping hub; old car post redirected
4	Tag Manager and Cloudflare plan handed over; speed re-test	UAE car page; Pakistan rewrite
5–6	Locale review: hreflang completed, copies consolidated	Moving pages for Dubai, the UK and Canada; Ghana and UAE rewrites
7–9	Office location markup; subdomain indexing fixes	Sri Lanka and Bangladesh pages; freight-forwarding page; 5 office pages; Nigeria car route page; India moving, international relocation and India-to-USA rewrites
10–12	Quarterly re-audit	About 15 templated country pages rewritten; rate tables refreshed; UK and Canada shipping rewrites

One monthly fee, everything above included

MONTHLY RETAINER

\$1,899 USD / month

Billed monthly in advance. 6-month initial term, then month to month with 30 days' notice.

- Technical SEO, implemented in code
- Structured data across all templates
- 5–6 content pieces a month (new pages and rewrites)
- Keyword map and question bank
- Weekly rank tracking, monthly report and review call
- Re-crawl after every release
- One named senior strategist

Not included

- Link building and digital PR (quoted separately on request)
- Paid search and social advertising
- Changes made inside third-party accounts (Tag Manager, Cloudflare, Google Business Profile). We give step-by-step instructions; SFL's account owners apply them.
- Third-party tool subscriptions, if SFL wants its own seats

What we need from SFL

- Access to Google Search Console and Google Analytics
- Access to the website code repository and a staging environment, plus someone who approves and deploys our changes
- Current rates, transit times and customer examples for the pages we write, and a staff member to check facts before publishing
- A single point of contact for approvals

Getting started

1. **Sign this proposal.** We schedule a kickoff call within 3 business days.
2. **Grant access** to Search Console, Analytics and the code repository.
3. **Week 1:** we ship the canonical fixes and deliver the redirect map for approval.
4. **Week 2:** the redirects are live and the 90-day roadmap is signed off.

We don't guarantee specific ranking positions; no search engine allows anyone to. We commit to the scope, the timeline and a monthly report you can check against both.
