Lead Reactivation Plan: 3,800 Existing Leads

Prepared for: ⟦Business unit name⟧

Prepared by: Vinaygopal Mawandia · ⟦DATE⟧

Goal: turn an existing list of about 3,800 leads into booked conversations and revenue within 90 days, using the Facebook reel as the lead creative.

Run-rate figures are planning estimates, replaced by real numbers after the first wave.

1. Next steps

1. **Export and audit (days 1–3).**
   - Pull the full list with its source, date captured, last contact and consent fields.
   - Remove duplicates, bounced and invalid emails, and existing clients.
   - Check mobile numbers against the Do Not Call Register before any calls.
1. **Segment (days 3–5).**
   - **A: recent and good fit** (contacted in the last 2 years, matches the ideal customer). A person calls them.
   - **B: older, but still a fit.** Email and SMS, plus Meta retargeting.
   - **C: very old, poor fit, or no record of consent.** Meta custom audience only, or excluded.
1. **Consent check.**
   - Email and SMS go only to people who gave express consent, or where consent can reasonably be inferred from a past enquiry or business relationship.
   - Every message identifies the business and carries a working unsubscribe, actioned within 5 working days (ACMA).
   - Anyone uncertain goes into the Meta custom audience rather than the inbox, provided the privacy policy covers it.
   - *Confirm this with the business's privacy adviser.*
1. **Message and offer.**
   - A short, personal note from ⟦founder/name⟧ carrying the reel: "It's been a while. Here's what we're doing now [60-second reel]. Want ⟦offer, e.g. a free 30-minute review⟧?"
   - Three ways to respond: reply, use the booking link, or wait for a call from the team.
1. **Send in waves.**
   - **Wave 1** (days 8–14): about 600 contacts, segment A and the best of B. This tests the message on a part of the list before using all of it.
   - **Waves 2–3** (days 15–30): the rest of the contactable list, using whatever worked in wave 1.
1. **Retargeting.** Upload all contactable leads to Meta as a custom audience (hashed). Show them the reel for 30 days, then a second, offer-led ad to anyone who watched at least half of it.
2. **Follow-up.** Two follow-ups over 10 days. People who still don't respond get a useful monthly email (a tip, a short case, a new offer), never the same pitch again.

2. Thresholds per wave

Signal	Keep going	Change something	Stop
Reply or booking rate	2%+	1–2%: rewrite the message or offer	Under 1%
Unsubscribes and complaints	Under 1%	—	Over 1%: stop and review the list and message
Email bounces	Under 3%	3–5%: clean the list	Over 5%, or any spam block: stop email and fix the sending domain

Send from a **separate sending domain**, so the main domain's email reputation is protected while old addresses are tested.

3. Run rate (estimate)

Step	Conservative	Base	Assumption
Leads on file	3,800	3,800	
Contactable after clean-up and consent	2,300	2,700	60–70% survive the audit
Respond or book	45	80	2–3% across email, SMS, calls and retargeting
Qualified	18	32	40%
Meetings held	13	22	70% show up
Sales	⟦13–22 × close rate⟧		Depends on the offer; ⟦close rate⟧ to confirm
Revenue	⟦sales × average deal value⟧		⟦average deal value⟧ to confirm

4. Timeline

When	What
Week 1	Export, audit, segment, consent check; reel and messages ready
Week 2	Wave 1 (~600); calls to segment A; retargeting live
Weeks 3–4	Waves 2–3; first meetings and first sales
Weeks 5–8	Follow-ups; proposals closed; first revenue collected
Weeks 9–12	Second-touch campaign to people who engaged but didn't book; review and decide what to do with the list next

5. Weekly report

Each week shows:

- contacts sent and delivered;
- replies and bookings;
- unsubscribes and bounces;
- meetings held;
- proposals;
- sales and collected revenue;
- retargeting spend and results.

All of it is broken down by wave and segment.

6. What I need to start

- The full export, with source, date and consent fields.
- The reel itself: a file, or access to it. The share link needs a Facebook login.
- The offer for returning leads, the average deal value and the close rate.
- Access to the CRM or email tool, and a sending domain.
- One person in sales responsible for calling segment A.

Sources

- **ACMA:** Spam Act guidance (consent, sender identification, unsubscribe within 5 working days).
- **Do Not Call Register:** checking numbers before calling.
