Qubik Accounting: Reactivating 3,800 Existing Leads

Prepared for: Qubik Accounting

Prepared by: Vinaygopal Mawandia · 2 November 2026

Goal: turn about 3,800 past enquiries and contacts into booked reviews and new clients through one email and SMS funnel. It is built around Black Friday, Christmas and the New Year, with Dominic's reel as the opening creative.

Figures marked "estimate" are planning assumptions, replaced by real numbers after the first sends.

1. How the funnel works

One sequence, two channels:

- **Email** carries the story, the value and the offers.
- **SMS** goes only to people who have shown interest, or who are the highest-value segments. It's used for deadlines and reminders.

Every message points to one place: an offer page on qubik.com.au where people claim the offer or book an online review. There are no outbound calls. People come to Qubik when they're ready.

Stage	What happens	Moves on when
1. Clean and prepare	Audit, segment, verify emails, set up the sending domain	List is clean and segmented
2. Re-introduce	Dominic's reel and a short "here's what we do now" email; no hard offer	Opens, clicks or replies show who is still interested
3. Give value	Practical, seasonal tax and cash-flow tips	Clicks tag people by interest
4. Offer	Black Friday, then Christmas, then New Year offers, each with a deadline	Claim or booking
5. Convert	Online review held; engagement letter sent	Signed client
6. Nurture or sunset	Monthly email for the engaged; anyone with no opens or clicks after 4 emails is removed	EOFY campaign in April–May

Rules the automation follows:

- **A claim or booking** stops all offer messages to that person.
- **A reply** pauses the sequence, and a person answers within one business day.
- **An unsubscribe or STOP** removes them from every channel immediately.
- **A bounce** removes the address.
- **No opens or clicks after 4 emails:** they're moved to a sunset list, which protects deliverability.

2. Segmentation

Step 1: clean the list.

- Remove duplicates, current clients, bounced and invalid emails, and role addresses such as info@ or accounts@ where a named contact exists.
- Run the remaining emails through a verification tool.

Step 2: tag each contact on six fields. These are all available from the export or simple rules:

Field	Values
Relationship	Former client · enquiry that didn't convert · other contact
Entity	Business (company, trust, partnership) · sole trader · individual
Recency	Last contact within 12 months · 1–3 years · over 3 years
Interest (from the original enquiry)	Tax return · BAS and bookkeeping · business advisory · business set-up · other or unknown
Size, if known	Revenue or staff from the enquiry or past file
Channels and consent	Email and mobile · email only · mobile only; consent recorded or inferred from a past enquiry or client relationship

Step 3: assign each contact to one segment. The shares are estimates to replace after the audit.

Segment	Who	Est. share	Channels	Lead offer
S1 Former clients	Left Qubik in the last 3 years	~5%	Email + SMS	"Welcome back": first-year discount and a free handover from their current accountant
S2 Recent business enquiries	Businesses that enquired in the last 12 months	~10%	Email + SMS	Black Friday package offer
S3 Older business enquiries	Businesses, 1–3 years	~20%	Email; SMS once engaged	Black Friday package offer, then the New Year switch offer
S4 Sole traders and individuals	Tax returns and simple BAS	~25%	Email; SMS once engaged	Fixed-price tax return and BAS bundle
S5 Dormant	Any type, over 3 years, still with consent	~25%	Email only, reduced frequency	Re-introduction only; offers only after they engage
S6 No consent or unreachable	No consent record, or only a phone number without consent	~15%	No email or SMS; Meta custom audience only (optional)	Reel and offer shown as ads

Step 4: tag by behaviour after each send. Contacts move between tiers as they act:

- **Hot:** clicked an offer.
- **Warm:** opened or clicked any email.
- **Cold:** no activity.

Only Hot and Warm contacts get SMS (S1 and S2 receive it from the start).

3. Offer ideas by season

All offers are for new or returning clients and need Dominic's sign-off on pricing. Discounts must be real and stated plainly: no inflated "was" prices.

Window	Offer idea	Best for
Black Friday (early access Wed 25 Nov; public Fri 27 Nov – Cyber Monday 30 Nov)	⟦X⟧% off the first year of Business Basics or Business Advisory Solutions for clients who sign by 30 November	S2, S3, S1
	Free handover: Qubik takes care of the switch from the current accountant	All business segments
	Fixed-price tax return and BAS bundle for sole traders, locked for 2026–27	S4
Christmas (1–20 December)	Free 30-minute "year-ahead" review, booked online before the Christmas break: tax position, cash flow and structure for 2026–27	All engaged contacts
	Fixed-price catch-up bookkeeping: "start the new year with clean books"	S2, S3, S4
	Content hook: what Christmas parties and staff gifts mean for FBT (minor-benefits rules) and year-end tax planning	All segments (value, not offer)
New Year (5–31 January)	"New year, new accountant": fees locked for 2027, plus the free handover	S3, S5 (engaged only)
	BAS reminder: quarter-two BAS due in late February, with Qubik lodging it for new clients	S2, S3, S4
EOFY (April–June 2027)	Tax-planning review before 30 June, the biggest window of the year	Everyone still engaged

4. Calendar and messages

Dates (2026–27)	Email	SMS (Hot/Warm only, plus S1–S2)	Segments
Mon 9 – Fri 13 Nov	Domain warm-up: small daily batches, best segments first. Email 1: re-introduction with Dominic's reel	—	S1, S2, then S3
Mon 16 – Fri 20 Nov	Email 1 to S4–S5. Email 2 (value): "5 things to sort before Christmas" (tax, cash flow, FBT on	—	All

Dates (2026–27)	Email	SMS (Hot/Warm only, plus S1–S2)	Segments
	parties and gifts)		
Wed 25 Nov	Email 3: Black Friday early access, a day before everyone else	SMS 1 to S1 and S2: early access link	S1, S2
Fri 27 Nov	Email 4: Black Friday offer goes live	SMS to Hot contacts	S2–S4
Mon 30 Nov	Email 5: Cyber Monday, the last day	SMS reminder: "ends tonight"	Hot/Warm
Tue 1 – Fri 18 Dec	Emails 6–7: Christmas review offer; catch-up bookkeeping offer	SMS 2: "book before the Christmas break"	All engaged
Mon 21 Dec	Email 8: Christmas thank-you and office hours; no offer	—	All engaged
22 Dec – 4 Jan	Pause	—	—
Tue 5 – Fri 29 Jan	Emails 9–10: New Year switch offer; quarter-two BAS reminder	SMS 3: switch offer deadline	S2–S5 engaged
Feb – Mar	Monthly value email	—	Engaged
Apr – Jun	EOFY campaign	SMS for deadlines	Engaged

Sample messages (final copy to be approved):

- **Email 1 subject:** "It's been a while: here's what we're doing now" (from Dominic Guinea, Qubik)
- **Email 3 subject:** "Early access for you: Black Friday at Qubik"
- **SMS (Black Friday):** "Qubik: early access to our Black Friday offer, ⟦X⟧% off your first year. Ends 30 Nov. ⟦link⟧ Reply STOP to opt out"
- **SMS (Christmas):** "Qubik: book your free year-ahead review before our Christmas break. ⟦link⟧ Reply STOP to opt out"

Sending rules:

- Weekdays only. Email in the morning, SMS between 10am and 6pm.
- No more than 2 emails and 1 SMS a week per person.
- Every message identifies Qubik and has a working unsubscribe or STOP.

5. Thresholds

Signal (per send)	Keep going	Change something	Stop
Click rate	2%+	1–2%: change the subject line, offer or format	Under 1% across two sends: rethink the offer
Bounces	Under 2%	2–5%: re-verify the segment	Over 5%: pause and clean
Spam complaints	Under 0.1%	0.1–0.3%: slow down and tighten segments	Over 0.3%: stop the segment
Unsubscribes	Under 1%	1–2%: reduce frequency	Over 2%: stop the segment and review the message
Offer claims or bookings	1%+ of contacts reached	0.5–1%: sharpen the offer	Under 0.5% after Black Friday: replace the offer for Christmas

Open rates are only shown for reference. Apple Mail inflates them, so clicks, claims and bookings decide.

6. Run rate (estimate)

Step	Conservative	Base	Assumption
Leads on file	3,800	3,800	
Emailable after clean-up and consent (S1–S5)	2,300	2,700	60–70% survive the audit
Claim an offer or book a review	45	80	2–3% across all waves to 31 January
Qualified (a fit for Qubik's services)	27	48	60%; people who claim have already chosen an offer
Reviews held	19	34	70% show up
New clients	6	14	30–40% of reviews
New annual fees	6 × ⟦average annual fee⟧	14 × ⟦average annual fee⟧	Illustration: at A$4,000 a year, A$24,000–56,000 of recurring fees

Accounting fees recur, so each new client keeps paying in later years. The value of the list is therefore larger than the first-year numbers suggest.

7. Budget (estimate, ex GST)

Item	Range
Email platform for ~3,000 contacts	~A$50–150 a month
Email verification (one-off)	~A$50–100
SMS (about 1,000 eligible contacts × 3–4 messages)	~A$200–400
Separate sending domain and set-up	Small one-off
Optional: Meta retargeting for S6 and engaged contacts	A$300–600 a month
Total, November to January	**About A$400–950 without retargeting; A$1,300–2,750 with it**

Offer discounts are a margin decision for Qubik, not part of this budget.

8. Weekly report

By segment and by send, each week:

- emails delivered and click rate;
- SMS sent and clicks;
- bounces, complaints and unsubscribes;
- offer claims and reviews booked;
- reviews held;
- engagement letters sent;
- new clients and annual fee value;
- spend.

9. What I need to start

- **The full export,** with source, date, consent, relationship (former client or enquiry), entity type and service interest.
- **The reel,** as a video file.
- **Offer sign-off:** Black Friday discount, handover terms, bundle prices, catch-up bookkeeping price.
- **Systems:** access to an email platform, or approval to set one up; a separate sending domain (DNS access for SPF, DKIM and DMARC); an SMS sender.
- **One offer page on qubik.com.au** with a claim form and online booking. I can build it alongside the AI & Automation landing pages.
- **Qubik Accounting's average annual fee** per new business client, to fill in the revenue line.
- **Compliance:** confirmation from Qubik's privacy adviser on consent for older records. Offers must also be worded to meet the Tax Practitioners Board's rule that advertising must not be false or misleading.
